OLUWADAMILOLA JOHN JOSEPH

Business Analyst · Agile Delivery Specialist · SaaS & Fintech

Lagos, Nigeria | jholuwadamilola@gmail.com | +234 706 470 6095 | linkedin.com/in/oluwadamilola-joseph-578088b0

PROFESSIONAL SUMMARY

Results-driven Business Analyst and Agile Delivery Specialist with 3 years of end-to-end ownership across several platforms and in fast-paced remote environments. Proven track record of translating ambiguous stakeholder needs into structured backlogs, executable sprint plans, and measurable product outcomes including a 30% reduction in feature delivery cycle time and a 25% improvement in reporting efficiency.

Skilled in requirements elicitation, UAT coordination, stakeholder alignment, and cross-functional delivery leadership for API-integrated platforms. Currently expanding data capabilities in SQL and Power BI to strengthen analytical depth across the BA toolkit. Pursuing IIBA ECBA and BSC certification to complement hands-on Agile delivery experience with globally recognised credentials.

CERTIFICATIONS & CREDENTIALS

ECBA Entry Certificate in Business Analysis	**In Progress 2026**
Agile Scrum Master	Completed
Jira Project Management	Completed
Advanced Agile Methodology	Completed
Foundations of Scrum	Completed
Business Process Management & Improvement	Completed
Data Collection & Visualization	Completed

CORE COMPETENCIES, TOOLS & TECHNICAL SKILLS

- Requirements Elicitation & BRD Writing
- Agile / Scrum / Kanban / Hybrid SDLC
- User Story & Acceptance Criteria Authoring
- Microsoft Office Suite ▪ Power BI
- Jira · Confluence · Trello · Lucidchart · Miro
- SQL (In Progress)
- Backlog Ownership & MoSCoW Prioritization
- Sprint Planning, Review & Retrospectives
- UAT Planning, Coordination & Defect Triage
- Stakeholder Engagement & Communication
- Process Mapping & Gap Analysis (Fit-Gap)
- Delivery Forecasting & KPI Reporting
- Cross-functional Team Leadership
- Risk Identification & Change Management
- Google Workspace · Canva · Notion

PROFESSIONAL EXPERIENCE

Pro-ICE Limited | **Business Analyst / Project Manager** *2023 – Present*

Lagos & Abuja, Nigeria ·

End-to-end ownership of requirements, delivery coordination, and sprint execution for digital SaaS platforms serving enterprise and client-facing use cases across fintech, HR-tech, and food-tech sectors.

Delivery & Agile Execution

- Acted as primary delivery lead for a 6–8 member cross-functional team (engineering, QA, design, and product stakeholders), maintaining alignment between business goals and sprint execution across fully remote, asynchronous workflows.
- Stabilised the Eko-Fresh Food mobile platform mid-execution by re-validating 40+ requirements, restructuring backlog priorities using MoSCoW, and tightening sprint planning, reducing average feature delivery cycle from 3 weeks to 2 weeks (~30% improvement).
- Led end-to-end UAT coordination across multiple releases: defined acceptance criteria per user story, tracked and triaged defects in Jira, managed regression cycles, and secured formal stakeholder sign-off prior to every production deployment.
- Maintained full traceability from business objectives through user stories, test cases, and release outcomes, improving sprint predictability and reducing carry-over work by eliminating ambiguity at the definition stage.
- Collaborated with product stakeholders to build and maintain a prioritised roadmap using value scoring and effort-impact matrices, ensuring alignment between business strategy and engineering capacity.

Requirements & Documentation

- Delivered requirements and delivery coordination for Pre-Check, an API-enabled pre-employment verification platform translating HR workflow needs into structured functional specifications, data flow diagrams, and integration acceptance criteria.
- Produced end-to-end process maps and system diagrams in Lucidchart for 5+ platform features, reducing requirement ambiguity and cutting rework by approximately 30% within delivery cycles.
- Authored Business Requirements Documents (BRDs), functional specifications, user stories, sprint reports, risk logs, and retrospective summaries, maintaining a complete and auditable delivery record throughout each engagement.

Reporting & Stakeholder Communication

- Redesigned operational and delivery reporting dashboards, reducing manual data preparation time by 25% and improving executive visibility into sprint progress, blockers, risks, and release dependencies.
- Facilitated daily stand-ups, sprint planning sessions, sprint reviews, and retrospectives, maintaining consistent cadence across distributed teams and improving stakeholder confidence in delivery timelines.
- Anchored bi-weekly stakeholder reporting sessions, translating technical progress into business-readable summaries and escalating risks with recommended mitigations before they became blockers.

Dana Air | **Business Process & Performance Analyst (Contract)** *2023 – 2024 ·*

Lagos, Nigeria

Supported operational process improvement and HR performance management in a regulated, high-compliance aviation environment.

- Designed and implemented a KPI tracking framework across multiple departments, establishing measurable performance baselines and structured feedback cycles that increased operational productivity by 40%.
- Streamlined the new hire onboarding and training process by documenting end-to-end workflows, eliminating redundant steps, and introducing standardised checklists, reducing average onboarding time by 25%.
- Produced accurate, data-backed budget forecasting reports that improved financial planning visibility by 25%, enabling more informed resource allocation decisions across operational units.
- Documented HR compliance processes, internal audit trails, and standard operating procedures, ensuring the organisation maintained regulatory readiness across staffing and training operations.
- Analysed employee performance data to identify training gaps and inform targeted learning and development interventions, directly contributing to improved knowledge retention and operational consistency.

ImjBlack group | **Founder & Consultant** *2016 – 2023*

Nigeria

Founded and led a multi-service consultancy delivering project management, business advisory, real estate, and fintech payment solutions across diverse client sectors

- Developed and managed alternative payment solutions for students, facilitating access to educational fee payment solution and resolving infrastructural barriers to school fee payments
- Delivered academic consulting and research support services to students, including project guidance, research methodology, documentation, and report writing
- Managed construction and agricultural project oversight, including coordination of the Safara Farm project, overseeing operational workflows, vendor relationships, and on-site delivery

- Applied project management frameworks to coordinate cross-sector deliverables across fintech, real estate, education, and agribusiness service lines
- Managed client relationships, contracts, and operational processes, demonstrating sustained business leadership across a several field

PORTFOLIO HIGHLIGHT

DocFlow Application | Document Digitisation / Project Analyst **Pro-ICE · *2025 - 2026***

- **Problem:** A pension firm relied entirely on paper-based processes for document storage and client enrolment, creating inefficiencies in record retrieval, data accuracy, and overall operational workflow.
- **Approach:** I gathered and documented business requirements, identifying pain points across the firm's manual processes. Working with the team, we built a custom document capture application to scan and store all hard copy records digitally, while also redesigning the enrolment process to replace paper forms with online forms. I then conducted UAT to validate the system and produced user manuals to support staff training and adoption.
- **Outcome:** The firm's entire document library was successfully digitised, enabling instant retrieval of records and eliminating dependence on physical files. The enrolment process became fully digital, reducing processing time and improving data accuracy, with supporting documentation ensuring a smooth and sustainable transition for the team.

Tools & Methods: *Jira · PowerApps · zoom · MoSCoW Prioritisation · Agile / Scrum · UAT Coordination · Requirement gathering*

EkoFresh Food Marketplace Platform | Business Analyst / Delivery Stabilisation **Pro-ICE · 2023 – 2024**

Mobile food-ordering marketplace serving restaurant partners and end consumers. Brought in mid-execution to stabilise a delivery that had stalled due to unclear requirements and backlog misalignment.

- **Problem:** Platform was behind schedule due to unvalidated requirements, an unstructured backlog, and weak sprint planning, resulting in high carry-over work and eroding stakeholder confidence.
- **Approach:** Conducted a full requirements re-validation across 40+ backlog items, applied MoSCoW prioritisation to eliminate noise, and rebuilt the sprint planning structure with clear definition-of-done criteria and explicit dependency tracking in Jira.
- **Outcome:** Reduced feature delivery cycle time from 3 weeks to 2 weeks (~30% improvement), restored product-engineering alignment, and established a delivery cadence that the team sustained through project completion.
